SUMMARY

Results-driven BTech Computer Science final-year student currently working as a **DevOps Intern at Zion Technology**, with hands-on experience in CI/CD automation, containerization, and cloud infrastructure on AWS. Holder of **AWS Certified Cloud Practitioner** and **Oracle Cloud Infrastructure 2025 Foundations Associate** certifications. Proven ability to reduce deployment time and improve release reliability through automated pipelines using Jenkins, Docker, and Kubernetes. Seeking a DevOps Internship / Entry-Level Cloud Engineer role to build scalable, automated deployment pipelines.

TECHNICAL SKILLS

Programming	: Python, Bash Scripting
IaC	: Terraform
OS	: Linux (Ubuntu, CentOS)
Containers & Orchestration	: Docker, Kubernetes
CI/CD & DevOps Tools	: Jenkins, Git, GitHub, GitHub Actions
AWS Services	: EC2, S3, IAM, VPC, ALB, ECR, ECS, Route 53, CloudWatch, Elastic Beanstalk
Monitoring	: CloudWatch, SonarQube
Other	: YAML, Nexus, Agile/Scrum basics

EXPERIENCE

DevOps Intern

Jan 2026 – Present

Zion Technology | Mohali, Punjab

- Automated CI/CD pipelines using **Jenkins and GitHub Actions**, cutting manual deployment effort by approximately 35%.
- Configured and maintained **Kubernetes** clusters using YAML manifests; managed pods, services, and load balancers for zero-downtime deployments.
- Provisioned and managed AWS infrastructure (**EC2, VPC, IAM, ALB, CloudWatch**) to support staging and production environments.
- Monitored application health and set up **CloudWatch** alerts, reducing incident response time.
- Collaborated with dev team using **Git branching strategies** (GitFlow) to maintain clean, deployable codebases.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services | Issued: Sep 2025 | Valid Until: Sep 2028

Oracle Cloud Infrastructure 2025 Foundations Associate (1Z0-1085-25)

Oracle | 2025

PROJECTS

Automated CI/CD Pipeline for Java Application [\[GitHub\]](#)

Tools: Jenkins, Docker, SonarQube, Nexus, AWS ECS, ECR

- Designed and implemented a fully automated CI/CD pipeline using **Jenkins, SonarQube, Nexus, Docker, and AWS ECS**, from code commit to production deployment.
- Containerized a Java application with Docker, pushed images to **Amazon ECR**, and deployed to ECS for auto-scaling.
- Reduced deployment time by 40%** and improved release reliability by eliminating manual deployment steps.

AWS VPC Architecture & Secure Cloud Infrastructure [\[GitHub\]](#)

Tools: AWS VPC, EC2, IAM, ALB, CloudWatch, Route 53

- Architected a secure, multi-tier AWS VPC with **public/private subnets, NAT Gateway, and Application Load Balancer**.
- Configured fine-grained **IAM roles and policies** following least-privilege principles to secure cloud resources.
- Set up **Route 53 DNS routing and CloudWatch dashboards** for monitoring and automated alerting.

Kubernetes-Based Scalable Application Deployment

Tools: Kubernetes, Docker, YAML, Linux

- Deployed containerized applications on a **Kubernetes cluster** using YAML configuration files for Deployments, Services, and ConfigMaps.
- Implemented **Kubernetes Load Balancer services** to resolve unstable pod networking and ensure high availability.
- Automated rolling updates and rollbacks using Kubernetes deployment strategies, ensuring zero-downtime releases.

EDUCATION

BTech in Computer Science & Engineering	Aug 2022 – May 2026 (Expected)
<i>Himachal Pradesh Technical University, Hamirpur</i>	
Class XII – HPBOSE	2021
<i>Government Model Senior Secondary School</i>	
Class X – HPBOSE	2019
<i>S D Model School, Lanj</i>
